### Jersey State Controls chosen for new BMS at the \$120m Trenton Central High School

In 2004/2005, JSC was fortunate to be selected for two HVAC control installations in new schools for the Trenton BOE/SDA. Both Joyce Kilmer School and the new Martin Luther King Jr. facilities were part of the Schools Construction Corp. program offered for implementing an overhaul of the educational infrastructure of hundreds of schools in districts throughout all 21 counties of the State of New Jersey. The legislation allocated \$2.9 billion for 31 special-needs districts.

At the time, JSC was unaware of the relationship that would ensue between JSC and TBOE. In the past decade, JSC has installed controls in 10 of the district's facilities. ***Schneider Electric Continuum products were recently flat specified for the HVAC controls and BMS for the new \$120m Trenton Central High School.***

JSC will be working with Brian Trematore Plumbing and Heating, Terminal Construction will lead the Design/Build Team, and piloting the MEP design will be Johnson and Urban Engineering.

This contract represents a continued commitment from the TBOE to provide sustainable, energy efficient facilities in the District while maintaining a "control system standard" which saves the HVAC maintenance staff time and money, monitoring equipment operation and handling temperature related complaints.

JSC thanks the TBOE for their patronage and loyalty to Schneider Electric Continuum products. The execution team at JSC looks forward to backing their promises with fast action and quality driven service and support.

JSC has been in business since 1983 and has been serving the K-12 marketplace since 1989. They are family owned and operated, employ a team of forty three skilled individuals and has represented Andover Controls/Schneider Electric for over 30 years.
